

OFFICE OF PUBLIC INTEGRITY

Janson D. McNair, Director

Publicly Disclosed Information:

OPI Case Number 21-385

Date: 5/20/2021

ALLEGATIONS:

Complainant stated they were verbally threatened by residents of a county facility. They complained that they were not formally trained for the position, and only received on the job training. Complainant also states the facility was not providing adequate care or clothing to the residents, was not disciplining residents for their threats, and were allowing other staff members to trade food to residents and were allowing residents privileges beyond those mandated by regulations.

FINDINGS:

OPI researched the allegations and found that the facility is providing adequate care that the complainant did not feel was enough. OPI found that the positions only required a yearly in-service training which the complainant had not yet received. Their other complaints were referred to the department head to address as routine personnel and administrative complaints.

FINANCIAL IMPACT:

None
